APPENDIX A

Oil and Gas Docket No. OG-19-00001773- This hearing is held to consider the application of Chevron U.S.A. Inc to reclassify certain wells from Oil to Gas and to Amend Field Rules for the Ford, West (Wolfcamp) Field, in Culberson, Loving, and Reeves Counties, Texas; District 08.

Applicant seeks the following:

1. Chevron requests that Rule 4(c) be added to the of the Ford, West (Wolfcamp) Field rules as follows:

RULE 4(c): Upon an operator's written request, the Commission shall cancel overproduction for any lease in this field for any twelve one-month period.

2. Chevron requests that Rule 6 of the Ford, West (Wolfcamp) Field rules be added as follows:

RULE 6: An exception to Statewide Rules 16(b), 28(a), 28(b) and 51(a) is granted for wells in this field to provide operators time for well stabilization prior to testing as follows: Well Record Only completion reports will be considered timely filed if received by the Commission within 90 days after completion of the well or within 150 days after the date on which the drilling operation is completed, whichever is earlier. Initial Potential completion reports will be considered timely filed if received by the Commission within six months of well completion. Failure to comply with this provision will not prevent permanent gas well classification as provided in these field rules.

This rule shall allow for the backdating of allowables without requiring a waiver to be secured from all field operators. This rule will grant the Commission the authority to issue an allowable back to the initial completion date for all oil wells and gas wells in the field to prevent unnecessary shut-ins and to alleviate potential overproduction issues related to the completion paperwork filings.

The exceptions to Statewide Rules 16(b), 28(a), 28(b), and 51(a) provided for in the rules adopted in this Final Order shall be applicable to all wells in the field, regardless of when completion forms are filed and including wells for which completion forms were filed prior to the entry of this order.

Where an operator uses sand trap(s) during clean-up of the well after fracture stimulation, the operator may note in the Remarks Section of the Initial Potential Form the date that the sand trap(s) were removed. The operator's Initial Potential Form will then be due ninety (90) days after removal of the sand trap(s).

3. Chevron requests that Rule 5 of the Ford, West (Wolfcamp) Field rules, the Stacked Lateral provision in these field rules, be removed to harmonize the rules with Statewide Rule 86. As a result, the Stacked Lateral provisions of Statewide Rule 86 would apply to the Ford, West (Wolfcamp) Field.

For a list of wells, please see Attachment A.

Oil and Gas Docket No. OG-19-00002098- This hearing is held to consider the application of Chevron U.S.A. Inc to Amend Field Rules for the Wolfbone (Trend Area) Field, in Pecos, Reeves, and Ward Counties, Texas; District 08.

Applicant seeks the following:

1. Chevron request that Rule 2(b) be amended as follows:

RULE 2(b): No horizontal drainhole well for oil or gas shall hereafter be drilled such that any take point is nearer than ONE HUNDRED (100) feet in a non-perpendicular distance from the orientation of the horizontal drainhole to any property line, lease line or subdivision line.

2. Chevron requests that Rule 6 be amended to provide for an initial “records only” completion filing within 90 days of completion and an accurate and complete completion form within 180 days of completion.
3. Chevron requests that Rule 7 be removed to harmonize the rules with Statewide Rule 86. As a result, the Stacked Lateral provisions of Statewide Rule 86 would apply to this field.
4. Chevron requests the following rule from the Phantom (Wolfcamp) Field be adopted in this field.

RULE ?: Operators in the field are granted blanket authority for common storage, including offlease storage, for all wells completed in the field which are separated and measured as required by statewide rule prior to commingling for common storage. This rule only grants authority for common storage of production from leases where, unless individual lease exception to statewide rule onlease measurement requirements has been obtained, lease production is separated and measured prior to leaving the lease and the lease production is properly reported to the Commission. This rule does not in any way affect the filing and reporting requirements for allocation and production sharing wells. Individual exceptions to Statewide Rules 26, 27, or 55, relating to separation and/or measurement may still be requested for any well or lease in the field.

CONSENT TO ELECTRONIC SERVICE AND NOTIFICATION OF DOCUMENTS, RULINGS, DECISIONS, AND ORDERS

Effective September 1, 2015, Section 2001.142 (Notification of Decisions and Orders) of the Texas Government Code was amended to allow a state agency to notify each party to a contested case of any decision or order of the agency, if agreed to by the party to be notified, by electronic means sent to the current e-mail address of the party's attorney of record or of the party if the party is not represented by counsel. Tex. Gov't Code § 2001.142(a)(2).

Commission Practice and Procedure rules, §1.45(e)(2) and §1.45(b). If the person consents to be served by email, the person affirmatively consents to the release and disclosure of the email address. Email service is complete on the date of the email transmission. An email received after 5 p.m. local time of the recipient shall be deemed served on the following business day."
